Introduction

Madline Concepts is a concept development firm dealing in interior design (design and build) and branding (Combining Graphic Design and Space planning in finding solutions for clients who want to advertise their products in the in-store environment).

Formed and registered in April 2008, we are now in our 11th year and we can testify that GOD has indeed been good all the time!

With fully fledged wood and metal workshops, we are able to customize unique pieces of and on site.

We also:-

- Develop concepts for other interior design firms, architects and landscape architects/ designers for brain storming purposes.
- We develop in-store branding units/ visual merchandizing and display for marketing departments who wish to display their products in creative display units.
- We build complex installations that seem to be out of scope of other interior designers and contractors

We continue to add onto our portfolio successful projects and the experience that tags along.

How we Work

We combine our unique approach to problem solving with attention to detail in attending to your brief whatever your brief we'll take it head on to your satisfaction.

Once designs are approved, our highly qualified technicians and installers, painters, plumbers, electricians work diligently to actualize the designs

Due to the top of industry position we work to attain and retain, we are commitment to deliver exemplary outcomes for our clients.

We love to work for clients who uphold high levels of integrity. Madline Concepts does not engage in projects where there is lack of integrity. We believe that GOD our FATHER, through JESUS CHRIST HIS SON, will bring every deed, word and thought to judgment, we have chosen to be right in our dealings.
